

## IDC4252C

### M03ProjectA

#### **Instructions**

Use SAS to create visualizations of time series data.

In the SAS for Finance book, the Forecasting Stock Prices and Portfolio Decisions Using Time Series chapter, start in the section titled Visualization of time series data. Review the background and business case study.

Use SAS Studio to complete the coding sections, generating descriptive statistics and visualizations. Include a comment at the top of your SAS file to include your name and the assignment.

Take screenshots of the plots and paste in a Word document / PowerPoint presentation. 'Save As' a PDF file and add to the M30ProjectA GitHub repo.

Save your SAS code and add to the M03ProjectA GitHub repo.
